Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 21 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 3. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). It is agreed that claims 1 and 21 have different scope.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 14, 15 and 18-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. In view of applicant's arguments bridging last paragraph on page 3 and paragraph 1 on page 4 of the amendment mailed 8/26/02, it is not clear what is recited through "at least one of the thin film device layers comprising a memory cell array" and "a plurality of layers among the thin film device layers comprising one memory" in claims 14 and 15, respectively, because applicant merely repeats the claim language.

Art Unit: 2823

5. Claims 18-20, in view of applicant's arguments on page 4, paragraph 2, it is not clear what is recited through "different design rules", "different design parameters" and "different fabricating processes". The three phrases are different at least because different things are formed.

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi ('585) in combination with Vu et al. ('124) as previously applied.

The rejection is maintained as stated in paragraph 14 of the Office Action mailed on 4/24/02.

Art Unit: 2823

Response to Amendment

9. Applicant argues that the process of the combination fails to disclose separating the second device layer through irradiating the adhesive layer by light. However, Vu et al. is merely relied on as a teaching of the adhesive layer as a suitable material and method of employing the adhesive layer in the process of Hayashi. Vu et al. teaches transferring a device to a substrate comprising interconnect patterns using the recited adhesive layer and method.
